Hello World
Going Live using the "live server" extension
To see your webpage in action, locate the "Go Live" icon at the bottom-right corner of your VS Code window and click it. If you don't see this icon, you probably haven't installed the Live Server extension, which we discussed in a previous tutorial.
Your First Website is Live!
Congratulations! If you've followed along, you should now see your very first website displaying the classic "Hello, World!" message.
HTML execution means how HTML is being executed
Hello World
